Projects

Connectify Video Calling Realtime Chat App <i>Node.js, Express, MongoDB, React, Tailwind</i>	Apr 2025
- Architected and deployed Connectify, a full-stack, real-time video and chat platform leveraging the MERN stack. - Enforced JWT-based authentication, securing user data and 10+ critical application routes. - Engineered a seamless user onboarding flow, reducing initial setup time by 20% and boosting engagement. - Integrated WebRTC for reliable real-time video calling and chat functionalities with a fully responsive Tailwind UI. - Developed 20+ reusable React custom hooks, improving code modularity and accelerating feature development. - Optimized the RESTful API service layer to handle concurrent connections and ensure sub-100ms data latency. - Implemented 5+ dynamic UI themes and personalization options, enhancing user experience and retention. - Built a resilient friend management system backed by efficient MongoDB queries for secure social interactions.	
FinTrack Expense Tracker App <i>MongoDB, Express, React, Node.js</i>	Jan 2025
- Constructed a dynamic React dashboard visualizing real-time balance, income, and expenses. - Managed full CRUD lifecycle for financial transactions, supporting categorization and detailed record keeping. - Integrated Bar, Pie, and Line charts for 360-degree visualization of spending trends. - Developed a 'Recent Transactions' view providing instant access to the latest 10 entries. - Designed an intuitive, mobile-responsive interface for seamless cross-page navigation. - Optimized 15+ core REST APIs (Node.js/Express) ensuring data integrity and rapid processing.
